ABSTRACT

5       The present invention provides a method for  
preparing a hair dermal papilla cell preparation  
comprising preparing a cell suspension by removing  
epidermal tissue from skin tissue and subjecting the  
resulting dermal tissue fraction to collagenase  
treatment, and cyropreserving the cell suspension to kill  
the follicular epidermal cells. The present invention  
10       also provides a composition for regenerating hair  
follicles comprising hair dermal papilla cell and  
epidermal cells, wherein the ratio of the number of hair  
dermal papilla cell to the number of epidermal cells is  
from 1:10 to 10:1.
